1. Which statement about the number 34 is true? A. It is odd, because the digit in the statement about the number in the statement about the s	2. Scott has 28 toy cars to put on 4 shelves. He wants to put the same number of cars on each shelf.	3. What number goes in the to make the equation true?
A. It is odd, because the digit in the tens place is odd.	How many toy cars should Scott put on each shelf?	□ ÷ 11 = 9
B. It is even, because the digit in the tens place is even.	A. 32, because 4 + 28 = 32	A. 99
C. It is odd, because it can be divided by 3 evenly.	B. 112, because 28 x 4 = 112	B. 91 C. 20
D. It is even, because it can be divided	C. 7, because 4 x 7 = 28	D. 2
by 2 evenly.	D. 24, because 28 - 24 = 4

4. Marty had 6 toy cars. He told his sister that she could have all the odd numbered cars. Which list shows the cars that Marty's sister can have?	5. Griselda Gooch loves to chew gum. She has 18 sticks of gum, and she wants to chew the same number of pieces a day for 9 days.	6. What number goes in theto make the equation true?÷ 2 = 10
A. 13, 27, 81 C. 13, 58, 72, 34	How many pieces of gum should	
B. 13, 27, 34 D. 58, 72, 34	Griselda chew each day?	A. 5
13	A. 2, because 2 x 9 = 18	B. 12
	B. 27, because 9 + 18 = 27	C. 8
58	C. 162, because 9 x 18 = 162	D. 20
81 34	D. 9, because 18 - 9 = 9
