Unit: 3rd – Adding & Subtracting 2-Digit Whole Numbers Review

Lesson: 2-digit minus 1-Digit Subtraction Review

Problem Set 5

Mental Subtraction Tip: Use known subtraction facts to figure out problems with bigger numbers. You know $11 - 3 = 8$, so you know the answer to $41 - 3$ will end in 8, but it will be in the 30's (thirty-something), so 38.
