Rounding Race

To win: Be the first player to fill in all 10-numbers on your race card.

Player 1 draws a number card and a rounding card and finds the answer. She fills in her answer on the space where the number in the “target” place matches the number on the race card.

For example, if she pulls the number 345,062 and the rounding card “Round to the nearest thousand” – she would write the rounded number 345,000 in the “5” place on the race card Because the target place is thousands and there is a 5 in the thousands place after rounding.

Continue taking turns among the players until someone completes all 10 spaces on the race card.

If a player can’t fill in a space it is the next player’s turn.

Return used cards to the bottom of the appropriate stack.

Print: One-sided
