## 4-in-a-Row

Materials: 4-in-a-row Gameboard (Pizza Box) 6-sided die Dry erase boards/ markers/erasers

## Set up:

Shuffle the game cards and place them face down in the spaces on the gameboard so that the big numbers on the back of the cards are showing.

## To play:

This is a game for 2 players. If you have more than 2, you will need to start more games.

Player 1 rolls the die and picks a card that corresponds to the number rolled. For example, if Player 1 rolls a 6, they can pick any card on the board with a 6.

If the player answers the question correctly, they can mark the space on the gameboard with their initial. If the player misses, take that card of the board and replace it with one of the extra question cards.

If the player rolls a number that is not on the board then that roll is "wild" and the player can choose any card to answer.

## To win:

First player to get 4-in-a-row in any direction wins.
